

Product description BRODIT Device holder

The Brodit device holder is the ideal attachment in the vehicle with connection to the power supply.

It is optimized for the Samsung [Tab Active 2] including the protective case. It has a Pogo PIN charging point with which the device can be charged.

You can choose between two variants for the charging plug:

- Holder with charging connection for 12/24V (cigarette lighter)
- Mounting MOLEX variant with open ends for fixed wiring to a power source
